

"Our decision to choose MediaNet Solutions, Inc. as our special data management system was a well thought out decision. Five years later, that decision proved to be **an excellent choice** for our staff and students alike. Enhancements to the software continue to meet special education's ever changing needs. The Medicaid billing component makes claim submission a seamless transition. Cave Creek looks forward to growing with MediaNet Solutions, Inc."

Janet Holt
President, Arizona CASE
 Director Special Education Services
 Cave Creek Unified School District

a comprehensive
data management solution

"As President of CASE Arizona and a local director utilizing e-IEP PRO, I thank the national organization in recognizing **a quality product that works well** for many districts in our state. We have worked with MediaNet for several years now and found the relationship beneficial and valuable in meeting our needs."

Michael L. Remus
President, AZ CASE (2011/12)
 Director of Student Support Services
 Deer Valley Unified School District

user-friendly **INTUITIVE**
 software design

"Each year, the list of districts opting for the e-IEP PRO program grows. The three areas in which I feel this company **excels in comparison to its competitors** are: (a) responsiveness to customer's needs, (b) overall product design, and (c) utility of the product for special education directors. These areas of support are valued by directors of special education who can attest to the demonstrated performance of this product. MSI is certainly worthy of endorsement."

"MediaNet Solutions, Inc. has established **credibility and trust** amongst special education directors in Arizona for producing a product that is fluid and responsive to the various legal, statutory, and federal requirements placed upon us."

Maria Berecin-Rascon Ed. D.
President, AZ CASE (2010)
 Director of Special Ed.
 Casa Grande ESD
